Your connection to perfection

AI an Alberta Industries company

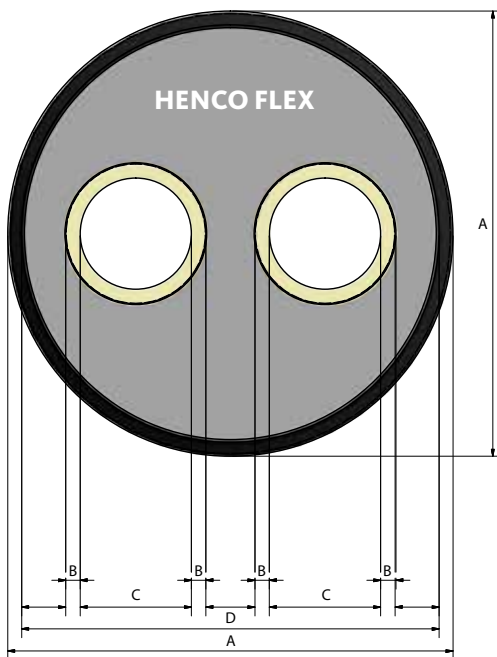

HENCO FLEX

Henco Flex is the pre-insulated solution to connect your heat pump, ensuring the safe and simple supply of water into your house. The two Henco standard multilayer pipes integrated centrally in the insulation allow the installer to choose the connection himself: Henco Vision, Henco Press, Henco Brass Press or Henco MultiSleeve.

Henco Flex is also suitable for district heating systems and other outdoor applications. The closed-cell structure of the PE foam which is extruded simultaneously with the outer jacket ensures an optimal insulation.

Unique advantages

- ▶ Sturdy and extremely flexible
- ▶ No moisture segmentation in case of a damaged outer jacket
- ▶ Excellent insulation values thanks to the PE foam's closed-cell structure
- ▶ Minimum heat loss thanks to the homogeneous insulating material
- ▶ Various application possibilities: sanitary, heating, cooling, ...
- ▶ UV-resistant
- ▶ Easy to handle, lightweight material

Accessories

The rubber end caps create a watertight connection between the Henco multilayer pipe and the insulated jacket. Furthermore, the straight post-insulation set forms a watertight connection between two joined Henco Flex pipes.
